ALL PURPOSE PEBBLES

Offers a variety of stones that can be used for your next finishing or hardscape projects. Used either on its own or with a washout finish, the high sheen finish is consistent in its size and color to give a reliable finish to gardens or outdoor areas.

DECORATIVE STONES

are perfect when creating informal garden paths, separating landscaped areas or simply adding colour. There's no need to "square off" patios when you use these stones to create a relaxed and informal feel to the space.

FOR BEST RESULT USE

Polymer modified mixture of high grade Portland Cement and fine Silica Sand for Superior Adhesion and Flexibility in a medium-bed setting. Used for walls and floors for all types of natural and manufactured stones.

Penetrates surface to form a "wet look" protective barrier to prevent discoloration, stains and mold formation.

Formulated with advanced fluoropolymers to protect surface while allowing it to breathe and release moisture vapors.
